

Discover a simple and affordable alternative to digitalization!

Smaller and faster than a common digitalization solution, ScanGraph@Lite allows you to digitize several patterns simultaneously and in one click, using a camera or smartphone.

The principle:

- 1** Place the patterns on the support in the desired orientation.
- 2** Take a photo and open the file via ScanGraph@Lite
- 3** The pieces are digitized and ready to be used with the recognition of all patterns elements.
